

# SENSORY, ACADEMICS, AND BEHAVIOR: IT ALL GOES TOGETHER

**Presenters:** Nancy Beechy (Occupational Therapist) Brittany Budde (Special Education Teacher) Teresa Martin (Principal at Walsh Elementary District 92) Kim West (Assistant Superintendent for Special Education)

**\*\*The following is an overview of the presentation. The powerpoint will be available upon request during the session.**

**Mission Statement:** This session will explain how we integrate sensory and behavior intervention into academics within the classroom in our district. Focus will be placed on a multidisciplinary approach across settings and situations. Bringing the key stakeholders into the interventions to increase buy in for the success of the students. Concrete examples and strategies will be provided on how our district has been implementing sensory within all classrooms through joint cooperation.

- Introduction and discussion on Sensory Integration
  - Sensory Framework
  - Sensory Processing Defined: The way the body takes in information, analyzes, and produces a response based on the signals it receives from the environment.
- Principles of Behavior
  - Behavior Framework
    - Reconditioning behaviors, Motivating Operations, and Variables
- Investigation of the 7 sensory senses
  - Proprioceptive, Oral, Olfactory, Vestibular, Visual, Tactile, Auditory
  - Sensory Boxes
- Case Study Analysis
  - Examples from our district and discussion over how we addressed them
- Roadblocks
  - Roadblocks we have hit during implementation
  - Solutions to Roadblocks
- Questions?
