Paraprofessionals Can Do Virtually Anything: What Administrators Need to Know and Learn

Dr. Marie Stover

Wednesday, January 26, 2022 - 8:30am - 1:00pm

[Register Here](#)

Description of the Academy: The purpose of this academy is to provide participants with a better understanding in working with and providing training and support to Paraprofessionals within our schools. Paraprofessionals are often working one-on-one with students with significant physical, cognitive, and behavioral needs. Paraprofessionals are also leading small groups and providing instructional and behavioral support within the general education and special education setting. Recently, Paraprofessionals have also become instrumental in providing supports to students and staff with Remote Learning.

Outcomes: Participants in this professional development will gain strategies in leading, understanding and working with Paraprofessionals. Participants will develop a Paraprofessional tool-kit that could guide expectations for their positions within schools.

Target Audience: General and Special Education Administrators and Teachers

Total number of max participants: 100

Dr. Marie Stover is currently the Assistant Superintendent of Special Services at Morris Elementary School District 54. Dr. Stover recently graduated from the University of St. Francis with her Doctor of Education. She has had the privilege to work with students with special needs for over twenty years, across all grade levels in a variety of educational environments.
